

TITLE OF INVENTION

**Systems, Devices, Programs, and Procedures... Methods to use,  
Methods of doing business, and Business Model**

Be it known that I, Babak Ernest Arfaa, a citizen of the  
United States, residing at 2310 Cullum Road, Bel Air, Maryland  
21015, have invented certain new and useful improvements in

**Systems, Devices, Programs, and Procedures... Methods to use,  
Methods of doing business, and Business Model**

of which the following is a specification:

09346206-0502091

## CROSS-REFERENCE TO RELATED APPLICATIONS

Applicant claims the benefit of provisional patent application Serial no. 60 / 201,316, filed on May 02, 2000.

## BACKGROUND OF INVENTION

The present invention essentially relates to Internet, telephone, wireless, and other communications that evolve out of making motor vehicles' license plate digits a means of contacting or engaging in communication with specific motor vehicles, motor vehicle owners, and/or motorists.

There is no prior art that makes contacting, nor communicating with, specific motor vehicles, motor vehicle owners, and/or motorists via license plate digits.

## BRIEF SUMMARY OF THE INVENTION

The invention essentially connects motor vehicles, their owners, and/or their drivers to individuals, institutions, or other things that want to contact them by way of the motor vehicle's license plate digits. This is done with Internet, telephone, wireless, and other systems.

The invention is useful because motorists can connect with each other specifically, as now they cannot.

The invention is useful because motor vehicle-related institutions (Departments of Motor Vehicles, Motor Vehicle Insurers, Manufacturers, etc...) can now correspond with motor vehicles, their owners and/or drivers.
